

Santiago Ortega Marín

AI & Automation Engineer | Python | Machine Learning | Data Science | LLM APIs

Pereira, Colombia | (+57) 318 877 9388 | som5218@gmail.com | linkedin.com/in/santiago-ortega-engineer

Available in 15 days | Open to remote, onsite and relocation

PERFIL PROFESIONAL

Electronic Engineer with a Master's degree in Artificial Intelligence from Universidad de los Andes, graduated cum laude for academic performance within the top 3% of the average of the last five years. Experience developing Python-based automation, data analysis, machine learning, dashboards, APIs, chatbots and digital systems for real-world organizational environments. I have supported more than 5 public calls with over 1500 records, managed more than 300 company profiles, automated administrative and document workflows, and implemented AI-assisted content generation using LLM APIs.

HABILIDADES TÉCNICAS

Artificial Intelligence and Data: Machine Learning, Data Science, Python, Pandas, NumPy, Scikit-learn, Data cleaning, Data transformation, Model evaluation, Data visualization

Programming and Backend: FastAPI, Flask, Django, SQL, C/C++, Kotlin, API integration

Generative AI and Automation: LLM APIs, Prompt Engineering, Chatbots, Process automation, Automated content generation, Email automation, Document workflow automation

Tools and Infrastructure: Git, GitHub, Linux, Basic Docker, AWS EC2, Advanced Excel, Python dashboards, WordPress

EDUCACIÓN

Universidad de los Andes

Graduated on April 24, 2026

Master's degree in Artificial Intelligence | Bogotá, Colombia

- Cum laude distinction for academic performance within the top 3% of the average of the last five years.
- Focus areas: Machine Learning, AI systems, AI ethics, applied AI and data analysis.

Universidad del Quindío

August 2022

Bachelor's degree in Electronic Engineering | Armenia, Colombia

EXPERIENCIA PROFESIONAL

FIDATEC ONG COLOMBIA

September 2022 - December 2025

IT Development Advisor / Automation / Digital Solutions | Pereira, Colombia

- Managed and structured more than 300 company profiles across institutional platforms.
- Supported more than 5 public calls, administering processes with over 1500 participant and company records.
- Developed and maintained more than 5 institutional and operational websites for calls, brand presence and digital operations.
- Automated administrative tasks, document workflows, information download and email delivery using Python.
- Implemented content generation workflows using LLM APIs for marketing copy, advertising content and communication materials.
- Developed chatbot-based solutions for customer service and user support.
- Integrated digital payment functionality using ePayco.
- Led teams and processes by assigning responsibilities, tracking progress and ensuring deliverables.

Teleperformance

July 2022 - September 2022

Customer Experience Representative | Remote

- Provided support to DoorDash users by resolving operational requests through digital platforms.
- Managed cases under pressure using structured problem analysis and effective customer communication.

PROYECTOS RELEVANTES

Neurodevelopment analysis with MRI and DTI

Python | FreeSurfer | MRI | DTI | Biomedical data analysis

- Analyzed structural MRI and DTI data to support neurodevelopment research.
- Used Python and FreeSurfer to process, organize and analyze biomedical data.
- Applied reproducible computational analysis workflows in an applied AI and healthcare research context.

LLM-based content automation

Python | LLM APIs | Prompt Engineering | Marketing Automation

- Designed automated workflows for generating marketing copy, advertising content and commercial texts.
- Integrated LLM APIs to reduce content production time and improve communication consistency.

FORMACIÓN COMPLEMENTARIA

- MasterTrack in Artificial Intelligence: Machine Learning, Ethics and New Trends — Universidad de los Andes, 2024.
- Wireless Communications Diploma — Universidad del Quindío, 2021.
- IEEE Colombian BioCAS Workshop — Universidad del Quindío, 2020.
